Work Report:	Work continues in the yard area and football bridge. The existing net guard system in the yard area has been removed in preparation for the new net system to be installed. All accessible netting in the football bridge area has been removed in preparation for the new net system to be installed. All accessible bulk fouling in the football bridge area has been treated with a biocide to render all bacteria and pathogens inert before being removed. A further biocidle clean has been carried out to any remaining fouling. Please be advised that due to the acidic content of the fouling, some staining is inevitable. 14 feral pigeons were culled during today's cull. Work is ongoing.
Recommendations (Environmental/ Housekeeping/ Hygiene)
