Work Report:	At Neasden Depot, a pest control call-out was carried out regarding the shooting of live pigeons inside the depot shed. Upon arrival and inspection, the team identified live pigeon activity within the left-side shed area. Control operations commenced using approved shooting methods. During the course of the session, two pigeons were successfully culled. All blood stains and feathers resulting from the operation were thoroughly removed, and the affected area was cleaned to maintain hygiene and site standards. The carcasses of the culled pigeons will be disposed of in accordance with local regulations and environmental compliance requirements. The operation was completed successfully. Findings and actions taken were discussed with the DDM on site. AGS will continue to monitor pigeon activities
Recommendations (Environmental/ Housekeeping/ Hygiene)	NA
Recommendations (Fabric/ Proofing/ Structural)	NA
Recommendations (Other)	None
Product Used:	No products used
Non-Hazardous Waste (Grams)	0.
Hazardous Waste (Grams)	0.
